

## Windows 10

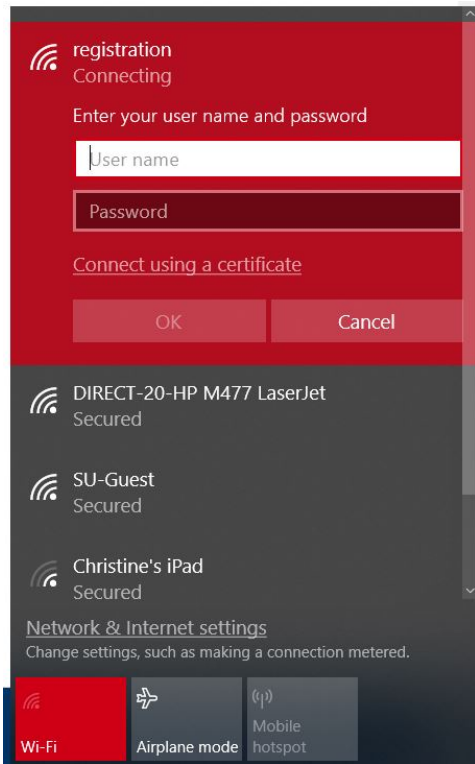

1. Open up the Wi-Fi icon on the System Tray. If the icon is not in the System Tray, go to Network and Internet in the Control Panel and select Show Available Networks.

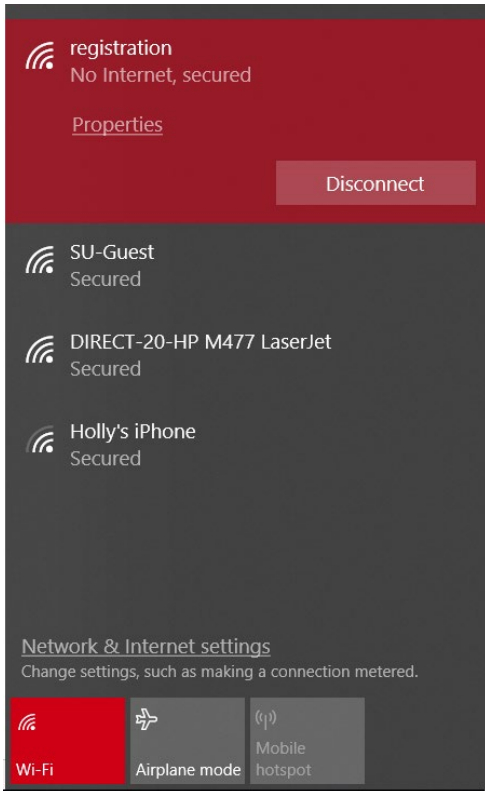

2. Select the “registration” network from the list.

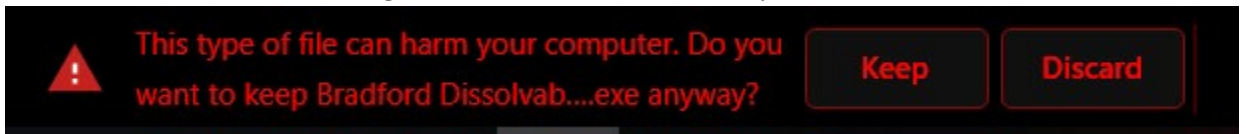

3. Enter your Shepherd username and password.

4. When connected, No internet, secured will display under registration.

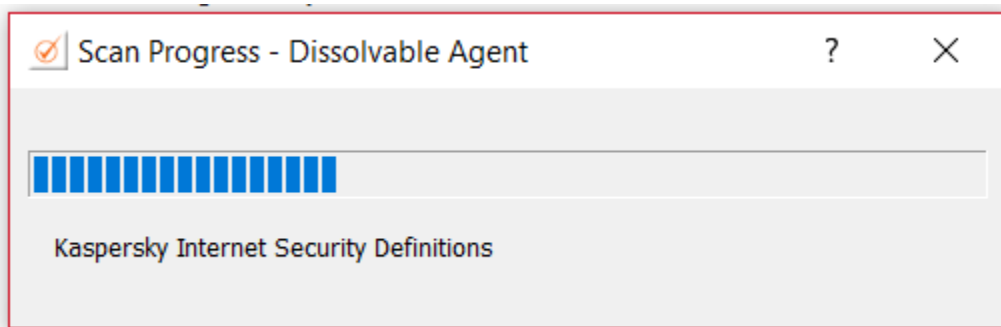

5. If a browser does not automatically open, go to [www.shepherd.edu](http://www.shepherd.edu) or if not auto-redirecated, go to <http://sunac8200.shepherd.edu>
6. On the Bradford Network Security page, select users who have a network account. (first link).
7. Enter your Shepherd username and password. Click the download button.
8. The file "Bradford Dissolvable Agent" will download. Select Keep.

9. Click on the icon to run the scan. Click Yes in the Security window.

10. The progress Bar will display. The scan may take several minutes.

11. If the anti-virus and operating system on the computer is up-to-date, the computer has passed and it is on the registration network.
